1. Open Arcserve Manager.
2. Click on Quick Access.

3. Select DataBase Manager.

4. Click on the + beside Job Records to expand log files.

5. Select Backup Job (usually this is the greatest Job ID Number).
6. Look in the upper right hand window and verify that all the jobs have a status of Finished, check the number of files, check the size, and verify that there are no missed files.

The screenshot displays the SQL Server Enterprise Manager interface. The left pane shows a tree view of backup jobs, with Job 23 selected. The main pane shows a table of backup sessions. The table has columns for Name, Sess.#, Type, Status, Backup Time, KB, Files, Missed, Flags, and Path. The data shows five sessions, all with a status of 'Finished'.

Name	Sess.#	Type	Status	Backup Time	KB	Files	Missed	Flags	Path
Session No. 1	1	NT MTPS	Finished	3/25/02 10:21 AM	1,946,726	17,821	0		(KZ-WORKS\...
Session No. 2	2	NT MTPS	Finished	3/25/02 12:07 AM	5,496,726	25,430	0		(KZ-WORKS\...
Session No. 3	3	NT Reg...	Finished	3/25/02 4:02 AM	2,008,726	99,817	0		(KZ-WORKS\Regis...
